Hablar con wineryIQ

Lo que puedes pedirle a Siri sin tocar el teléfono.

Para hacer esto	Di
Buscar una bodega	**“Search for a winery in wineryIQ”**
Mostrar un vino	**“Ask wineryIQ to bring up a wine”**
Bodegas cerca de ti	**“Show me wineries near me in wineryIQ”**
Ver tus etiquetas de vino	**“Show me my wine labels in wineryIQ”**
Añadir una botella	**“Add a bottle in wineryIQ”**
¿Me gustará?	**“Ask wineryIQ if I'll like this wine”**
¿Qué vino elijo?	**“Ask wineryIQ which wine I should pick”**
Sobre mi cava	**“Ask wineryIQ how many bottles I have”**
Preguntar por mi cava	**“Ask wineryIQ about my cellar”**
Guardar una bodega	**“Add a winery to my favorites in wineryIQ”**

No hay nada que configurar. Funciona nada más instalar la app, sin atajos que crear. Abre wineryIQ una vez primero.

En iOS 27, solo pregunta

Con Apple Intelligence en iOS 27, Siri entiende lo que quieres decir en lugar de reconocer una frase. Empieza con «Ask wineryIQ…» o «Search wineryIQ for…» y di el resto a tu manera, de una sola vez: ahí Siri no hace ninguna pregunta después, así que nombra la bodega o el vino al preguntar. wineryIQ se abre y muestra la respuesta: la página de una bodega, o una tarjeta que responde a una pregunta sobre tu cava o a si te gustará un vino.

“Search wineryIQ for Brady Cellars” · **“Ask wineryIQ how many bottles I have”** · **“Ask wineryIQ if I have any wines from Napa”** · **“Ask wineryIQ if I'll like a Pinot Noir”**

En iOS 26 y anteriores

Di la frase tal como está escrita. Siri las reconoce de forma bastante literal, así que una variante que no conoce responderá «no entiendo» aunque la función sirva. Las frases están en inglés en todos los idiomas, porque así las registra la app.

1. Buscar una bodega

Abre directamente la ficha de la bodega que nombres: horarios, dirección, teléfono y web. Si nombras una región, obtienes la lista de resultados.

> **“Search for a winery in wineryIQ”**

Siri pregunta «**Which winery?**»: responde en voz alta.

Tú	Search for a winery in wineryIQ
Siri	Which winery?
Tú	Brady Cellars
	wineryIQ se abre en Brady Cellars.

También funciona: “Ask wineryIQ to bring up a winery” · “Ask wineryIQ to show me a winery” · “Ask wineryIQ to find a winery” · “Ask wineryIQ about a winery” · “Bring up a winery in wineryIQ” · “Show me a winery in wineryIQ” · “Pull up a winery in wineryIQ” · “Search wineryIQ” · “Search wineryIQ for wineries” · “Search for a winery with wineryIQ” · “Search for wineries in wineryIQ” · “Search for a winery on wineryIQ” · “Find a winery with wineryIQ” · “Find a winery in wineryIQ” · “Look up a winery in wineryIQ” · “Look up a winery with wineryIQ”

2. Mostrar un vino

Abre la ficha de una botella de tu cava: su etiqueta, tus notas y valoración, la bodega, el pronóstico. Di el productor, o la uva y el año; si tienes varias del mismo productor, abre la más reciente y te avisa de que otras se acercaban. Si no está en tu cava, lo dice en lugar de abrir la botella equivocada.

> **“Ask wineryIQ to bring up a wine”**

Siri pregunta «**Which wine?**»: responde en voz alta.

Tú	Ask wineryIQ to bring up a wine
Siri	Which wine?
Tú	The Browne Merlot
Siri	Here's your Browne Family Vineyards Merlot 2020.
	wineryIQ se abre en la ficha de esa botella.

También funciona: “Ask wineryIQ to bring up a bottle” · “Ask wineryIQ to show me a wine” · “Ask wineryIQ to show me a bottle” · “Ask wineryIQ to pull up a wine” · “Ask wineryIQ to find a bottle” · “Bring up a wine in wineryIQ” · “Bring up a bottle in wineryIQ” · “Show me a wine in wineryIQ” · “Show me a bottle in wineryIQ” · “Pull up a bottle in wineryIQ” · “Find a bottle in my cellar in wineryIQ” · “Find a bottle in wineryIQ”

3. Bodegas cerca de ti

Abre wineryIQ en las bodegas que te rodean, sin preguntar nada. La indicada mientras conduces.

> **“Show me wineries near me in wineryIQ”**

Tú Show me wineries near me in wineryIQ

wineryIQ se abre en Cerca de mí.

También funciona: “Show wineries near me in wineryIQ” · “Wineries near me in wineryIQ” · “Find wineries near me in wineryIQ” · “What wineries are near me in wineryIQ”

4. Ver tus etiquetas de vino

Muestra a pantalla completa las etiquetas de vino que has fotografiado de una bodega. Desliza entre ellas y toca OK para salir. Si también fotografiaste la contraetiqueta, un botón la muestra. Di «wine labels» en vez de solo «labels»: Wallet también responde a esa palabra.

> **“Show me my wine labels in wineryIQ”**

Siri pregunta «**Which winery's labels?**»: responde en voz alta.

Tú Show me my wine labels in wineryIQ

Siri Which winery's labels?

Tú Brady Cellars

Se abren tus etiquetas de Brady Cellars, listas para deslizar.

También funciona: “Show my wine labels in wineryIQ” · “Show me my wine labels with wineryIQ” · “Show me my cellar in wineryIQ” · “Show my cellar in wineryIQ” · “Show me my winery labels in wineryIQ” · “Show my winery labels in wineryIQ” · “Show me a winery's labels in wineryIQ” · “Show my labels in wineryIQ” · “Show me my labels in wineryIQ”

5. Añadir una botella

Abre Mi cava con la cámara lista, así la botella que tienes en la mano está tres toques más cerca de tu estante. En un iPhone sin lectura de etiquetas abre el formulario para escribirla.

> **“Add a bottle in wineryIQ”**

Tú Add a bottle in wineryIQ

wineryIQ se abre en la cámara.

También funciona: “Add a bottle with wineryIQ” · “Add a bottle to my cellar in wineryIQ” · “Add a bottle to my cellar with wineryIQ” · “Add a bottle to wineryIQ” · “Add a wine to my cellar in wineryIQ” · “Add this bottle to my cellar in wineryIQ” · “Scan a bottle with wineryIQ” · “Scan a bottle in wineryIQ” · “Scan a wine label with wineryIQ” · “Scan a wine label in wineryIQ” · “Photograph a bottle with wineryIQ” · “Take a picture of a bottle with wineryIQ” · “New bottle in wineryIQ”

6. ¿Me gustará?

Responde en voz alta, sin abrir la app: si probablemente te gustará una uva o un estilo, con cuántas copas más o menos, con qué confianza y por qué, a partir de tus propias valoraciones. Di una uva, o di red, white, rosé o sparkling. Preguntar no guarda nada.

> **“Ask wineryIQ if I'll like this wine”**

Siri pregunta «**Which wine? Say a grape, or red, white, rosé or sparkling.**»: responde en voz alta.

Tú Ask wineryIQ if I'll like this wine

Siri Which wine? Say a grape, or red, white, rosé or sparkling.

Tú Pinot Noir

Siri You'll probably like a Pinot Noir: about four out of five glasses. Medium confidence, 70 percent. It's close to wines you rated highly.

También funciona: “Ask wineryIQ if I will like this wine” · “Ask wineryIQ if I'll like a wine” · “Will I like this wine in wineryIQ” · “Will I like this wine with wineryIQ” · “Will I like a wine in wineryIQ” · “Will I like it in wineryIQ” · “Would I like this wine in wineryIQ” · “Would I like a wine in wineryIQ” · “Do I like this wine in wineryIQ” · “Ask wineryIQ if I would like a wine” · “Ask wineryIQ will I like this wine” · “Forecast a wine in wineryIQ” · “Forecast a wine with wineryIQ” · “Should I order this wine in wineryIQ”

7. ¿Qué vino elijo?

Con una carta de vinos en pantalla —Mi cava, Análisis, Fotografiar una carta de vinos— Siri lee la clasificación de wineryIQ y te dice el vino que más probablemente disfrutes, y un segundo si lo hay. Si nada de la carta te encaja, lo dice.

> **“Ask wineryIQ which wine I should pick”**

Tú Ask wineryIQ which wine I should pick

Siri I'd pick the Shafer Cabernet Sauvignon. You'll probably like it: about four and a half out of five glasses, 75 percent confidence.

También funciona: “Ask wineryIQ which wine I'd like most” · “Ask wineryIQ which wine I would like most” · “Ask wineryIQ which wine I'd like best” · “Ask wineryIQ which wine I'll like” · “Use wineryIQ to tell me which wine I'd like most” · “Use wineryIQ to tell me which wine to pick” · “Use wineryIQ to pick a wine” · “Ask wineryIQ which wine to pick” · “Ask wineryIQ which wine to order” · “Ask wineryIQ what I should order” · “Which wine should I pick in wineryIQ” · “Which wine should I pick with wineryIQ” · “Which wine should I choose in wineryIQ” · “Which wine should I order in wineryIQ” · “Which wine should I get in wineryIQ” · “Which wine will I like in wineryIQ” · “What wine should I pick in wineryIQ” · “What wine should I order in wineryIQ” · “What should I order in wineryIQ” · “Pick a wine for me in wineryIQ” · “Pick a wine for me with wineryIQ”

8. Sobre mi cava

Responde de una vez, sin abrir la app: cuántas botellas tienes y de qué son sobre todo, tus mejores botellas, las últimas que añadiste o las que aún esperan una valoración.

> **“Ask wineryIQ how many bottles I have”**

Tú Ask wineryIQ how many bottles I have

Siri You have forty-two bottles in your cellar. Mostly Cabernet Sauvignon, Syrah and Merlot. Twenty-seven are rated.

También funciona: “Ask wineryIQ how many bottles are in my cellar” · “Ask wineryIQ how big my cellar is” · “How many bottles do I have in my cellar in wineryIQ” · “How many bottles do I have in wineryIQ” · “How many bottles are in my wineryIQ cellar” · “How many wines do I have in wineryIQ”

9. Preguntar por mi cava

Para cualquier otra cosa sobre tus botellas. Siri te pregunta qué quieres saber y lo dices a tu manera: una uva, un lugar, un productor, las mejores. Pide una uva y un lugar a la vez y obtienes los dos recuentos. Solo responde con lo que hay en tu cava, así que «nada de la Toscana todavía» también es una respuesta.

> **“Ask wineryIQ about my cellar”**

Siri pregunta «**What would you like to know about your cellar?**»: responde en voz alta.

Tú	Ask wineryIQ about my cellar
Siri	What would you like to know about your cellar?
Tú	How many Cabernets do I have, and how many are from Walla Walla?
Siri	You have four Cabernet Sauvignon bottles in total. One of them is from Walla Walla.

También funciona: “Ask wineryIQ about my wines” · “Ask wineryIQ about my bottles” · “Ask wineryIQ a question” · “Ask wineryIQ what I have” · “Ask wineryIQ what's in my cellar” · “Ask wineryIQ if I have a wine” · “Ask my cellar in wineryIQ” · “Question for wineryIQ” · “What do I have in my cellar in wineryIQ” · “Do I have a wine in wineryIQ”

10. Guardar una bodega

Añade una bodega a Favoritos sin abrir la app: útil cuando alguien te menciona una y tienes las manos ocupadas.

> **“Add a winery to my favorites in wineryIQ”**

Siri pregunta «**Which winery?**»: responde en voz alta.

Tú	Add a winery to my favorites in wineryIQ
Siri	Which winery?
Tú	Brady Cellars
Siri	Brady Cellars añadida a Favoritos.

También funciona: “Add a winery in wineryIQ” · “Add a winery with wineryIQ” · “Add a winery to my favorites with wineryIQ” · “Save a winery in wineryIQ” · “Save a winery to my favorites in wineryIQ”

Si Siri no entiende

Di la frase exactamente como aparece. La causa habitual es una pequeña variación. Si aun así no funciona, abre la app una vez y vuelve a intentarlo: iOS puede tardar un minuto en detectar las frases de una app recién instalada.

Si no encuentra la bodega

Te lo dirá, repitiendo lo que ha oído. Es deliberado: adivinar significaba guardar en silencio la bodega equivocada mientras anunciaba éxito. Los nombres se comparan por sonido además de por ortografía, así que los errores de audición corrientes siguen funcionando. Si lo que dijiste encaja igual de bien con varias bodegas, vuelve a preguntar en lugar de adivinar.

Building your own shortcuts

wineryIQ's actions appear in the Shortcuts app too, so you can combine them with anything else your phone does. One extra action lives there that has no spoken phrase of its own:

Find Wineries

Searches the wineryIQ catalog and returns matching wineries without opening the app.

Open wineryIQ Screen

Opens wineryIQ on a specific screen, like Near Me or My Cellar.

---

wineryIQ beta .9253 · 20 September 2026. Every phrase in this guide is read directly from the app's own code when the guide is built, so it cannot tell you to say something the app will not answer to.
